DEGREE PROGRAMMES

- B. Eng (Hons) in Electrical and Electronic Engineering
- B. Eng (Hons) in Mechatronic Engineering
- B. Eng (Hons) in Telecommunication Engineering
- Bachelor of Computer Engineering with Honours
- B. Eng (Hons) in Petroleum Engineering

APU AWARDED 5-STAR (EXCELLENT) RATING

APU was announced as among the Highest Rated Emerging Universities in Malaysia, being rated at 5-STAR (EXCELLENT Rating) under the SETARA 2017 Ratings by the Ministry of Higher Education (MOHE). APU has maintained this Excellent Rating in the SETARA 2011, 2013 and now in 2017.

APU IS A PREMIER DIGITAL TECH UNIVERSITY - MALAYSIA DIGITAL ECONOMY CORPORATION

APU was among the first universities in Malaysia awarded Premier Digital Tech University status by the Malaysia Digital Economy Corporation (MDEC). APU is recognised for its commitment to offer top-notch digital technology courses and ensuring our highly-skilled graduates continue to flourish and fill future digital job demands locally and globally.

: Why Us

Asia Pacific University of Technology & Innovation (APU) is amongst Malaysia's Premier Private Universities, and is where a unique fusion of technology, innovation and creativity works effectively towards preparing professional graduates for significant roles in business and society globally. APU has earned an enviable reputation as an award-winning University through its achievements in winning a host of prestigious awards at national and international levels.

NURTURING PROFESSIONALS FOR GLOBAL CAREERS

We nurture our students as professionals to ensure that we prepare you for the global challenges ahead. Your success is our best testimony; **over 95% of our graduates are employed by graduation.**

Established in 1993 / Part of APIIT Education Group

Purpose-built APIIT campus in Technology Park Malaysia

ENGINEER YOUR SUCCESS!

APU Engineering Degrees Accredited Internationally by the Washington Accord and Professionally by the Board of Engineers Malaysia (BEM).

OUTSTANDING SUPPORT

Regardless of the programme you choose, you will be supported by highly qualified and enthusiastic professionals. Many enjoy an international reputation for their research and actively engage with leading names in the industry.

INDUSTRY READY GRADUATES

The APU Career Centre connects and engages with over 10,000 Employers to ensure that our graduates are highly employed in both local and international corporations, as it closely supports APU students in both internship and career placement activities.

Superb employability track record

WORK-READY, WORLD-READY

Study with us and we'll equip you to become a world-ready professional, with the knowledge, attributes, skills and expertise that employers look for.

* Student Barometer Wave 2017, 'Studying with people from other cultures'

SETARA 2017

APU amongst the Highest Rated Emerging Universities

EXPERIENCE APU'S ICONIC CAMPUS

- A STYLISH BLEND OF FUNCTIONALITY & ACCESSIBILITY
- A UNIQUE FUSION OF TECHNOLOGY, INNOVATION AND CREATIVITY
- CUTTING-EDGE TECHNOLOGIES
- A WIDE VARIETY OF SPACES TO LEARN, ENGAGE & TRANSFORM

APU'S CAMPUS OF THE FUTURE

An ultra-modern campus built today for the needs of tomorrow

Asia Pacific University of Technology & Innovation (APU). This Ultra-Modern University Campus in Technology Park Malaysia (TPM) is designed to be the state-of-the-art teaching, learning and research facility providing a conducive environment for students and staff. TPM is the ideal location for this new and contemporary campus due to its strong positioning as Malaysia's primary hub for leading-edge and high-tech developments in a wide variety of areas. It is also located in one of the most rapidly developing areas in Kuala Lumpur, and is well served and accessible through major highways, LRT and other forms of public transportation.

APU's iconic campus is setting a new benchmark for design excellence among Malaysian Universities, combining an eco-friendly campus with a dynamic blend of technology and innovation to enable professional learning. It is a magnificent teaching & learning space for our Students & Staff designed by our award-winning architects & consultants.

Rated No:1
in Asia and Malaysia
for multicultural learning experience*

- B. Eng (Hons) in Petroleum Engineering*

WORLDWIDE RECOGNITION

UNDER THE WASHINGTON ACCORD

The School of Engineering at APU is one of our fastest growing schools and is gaining popularity among school leavers. This is because all the five engineering programmes offered by the School are current in terms of technology and are market driven, and thus have great employment opportunities.

The vision of the School is to be a leading provider of Engineering and Technology based education with innovative approaches to enhancing lifelong career opportunities. This is emphasised by our mission to provide engineering education based on a theoretical, experimental, and ethical foundation and enhanced by opportunities for participation in research, internships and interdisciplinary study.

For all degrees within the School, APU links with industry helps provide internship training placements for students. Internships are compulsory for all students as per the requirement of the Board of Engineers Malaysia.

** Programme is provisionally accredited by Malaysian Qualifications Agency (MQA).*

INTERNATIONAL RECOGNITION

Engineering Degrees Accredited under the Washington Accord

APU Engineering Degrees are fully accredited by the Board of Engineers Malaysia (BEM) which is a signatory to the Washington Accord.

This accreditation ensures that APU Engineering Graduates will have the following benefits in countries who are signatories of the Washington Accord:

- Opportunities to register as a Graduate Engineer with Board of Engineers Malaysia (BEM) or the relevant professional bodies in other countries who are signatories under the Washington Accord.
- Pathways to becoming a Professional or Chartered Engineer.
- Assurance that graduates are considered as having met international academic standards for engineering practice.

by the Board of Engineers Malaysia (BEM) and are therefore recognised internationally under the Washington Accord. Recognition under the Washington Accord allows for APU engineering programmes to be recognised by countries such as Australia, Canada, China, Chinese Taipei, Hong Kong, India, Ireland, Japan, Korea, Malaysia, New Zealand, Pakistan, Peru, Russia, Singapore, Sri Lanka, South Africa, , Turkey, the United Kingdom and the United States who are all signatories of the accord.

This allows APU graduates to be recognised in these countries for career opportunities towards achieving Professional/Chartered Engineer status or for further education progression. Furthermore, many countries which are not yet signatories to the Washington Accord also use this as a benchmark in recognising Engineering Degrees.

APU Engineering Degrees are Accredited Professionally

- B. Eng (Hons) in Electrical & Electronic Engineering
- B. Eng (Hons) in Telecommunication Engineering
- B. Eng (Hons) in Mechatronic Engineering
- Bachelor of Computer Engineering with Honours
- B. Eng (Hons) in Petroleum Engineering*

With this achievement, recognition under the Washington Accord enables APU Engineering graduates to work in any country in the world who are also a signatory to the Accord, without the need to re-qualify. The recognition is of utmost importance to the engineering education in Malaysia as graduates from accredited engineering degree programmes from Washington Accord signatory countries are considered as meeting the academic standard for practices in engineering at the international level.

Please refer to http://www.eac.org.my/web/list_accruited.html

The above benefits are applicable in the following countries, which are signatory to the Washington Accord:

“Signatories have full rights of participation in the Accord; qualifications accredited or recognised by other signatories are recognised by each signatory as being substantially equivalent to accredited or recognised qualifications within its own jurisdiction”

ENGINEERING

@ APU

THE AIMS OF THE APU ENGINEERING PROGRAMMES ARE TO OFFER:

- A broad education in the fundamentals of engineering principles and professional practices that form a strong flexible base which enables graduates to fill a variety of responsible engineering positions
- Specialised development in one area of concentration that will enable graduates to successfully perform at entry-level engineering positions. Some graduates will prefer and be capable of continuing their education in a graduate school
- A stimulating and accessible course of study necessary to understand the impact of engineering solutions in a global and social context, analysis and contemporary engineering issues which the students can develop and apply in their near future
- An opportunity for students with different abilities and different educational experiences to benefit intellectually and vocationally from their education in engineering courses
- Graduates who are able to demonstrate intelligence, ingenuity, inventiveness and independence in all areas of endeavour
- An intellectually demanding and stimulating programme of study and develop a life-long commitment to learning that develops graduates who are imaginative and innovative and who show initiative and creativity in their work

APU Engineering Degrees are accredited by the **Board of Engineers Malaysia (BEM)**.

1- INNOVATION

through the design of curriculum, the module content and the learning approaches

2: INTEGRATION

through developing your capabilities to interrelate knowledge and to work in multidisciplinary teams

3: INFORMATION

through developing your knowledge and also your abilities to communicate effectively and persuasively

4: INTERACTIVITY

through the use of group work to develop your teamwork skills and through the use of technology to achieve interactivity of devices and people

5: IMAGINATION

in relation to new products, ideas, applications and solutions

PATHWAYS & ADMISSION REQUIREMENTS

Your Study Progression

Admission Requirements

BACHELOR (HONS) DEGREE PROGRAMMES

Programmes	General Requirements
DIRECT ENTRY TO LEVEL 1 OF THE DEGREE:	
STPM	- Pass STPM with at least principal / full pass with Grade C (CGPA 2.0) in Mathematics and Physics or Chemistry and pass SPM with credit in Mathematics and Physics or Chemistry
A-LEVEL	- Pass 'A' Levels with at least a pass in Mathematics and Physics or Chemistry and pass 'O' Levels / GCSE or equivalent with Grade C in Mathematics and one of the science subjects - Physics or Chemistry
UEC	- Pass UEC or Senior Middle Three (SM3) with Grade B in five (5) subjects including Mathematics and one of the relevant science subjects - Physics or Chemistry and a pass in Bahasa Malaysia
MATRICULATION/ FOUNDATION	- Pass The APU Foundation or equivalent - Successful Completion of APU Foundation / Matriculation with a minimum CGPA of 2.0 and completion of SPM/O-Level or equivalent with credit in Mathematics and Physics or Chemistry
DIRECT ENTRY TO LEVEL 2 OF THE DEGREE:	
DIPLOMA	- Successful completion of the APU/APIIT Diploma or - Successful completion of Studies in another recognised institute with academic credits equivalent to Level 1 of an Honours Degree (Subject to the approval of the APU/APIIT Academic Board)

Any qualification that APU accepts as equivalent to the above.

ENGLISH REQUIREMENTS (only applicable to International Students)

Programmes	Requirements
Foundation and Diploma Programmes	<ul style="list-style-type: none"> • IELTS : 4.0 • TOEFL PBT : 397 • TOEFL IBT : 30-31 • Pearson (PTE) : 30 • MUET : Band 2
Bachelor (Hons) Degree Programmes	<ul style="list-style-type: none"> • IELTS : 5.0 • TOEFL PBT : 410-417 • TOEFL IBT : 35-45 • Pearson (PTE) : 36 • MUET : Band 3

Please note that under Ministry of Higher Education regulations, only students who have achieved the minimum requirement in the English Language proficiency assessment as indicated above will be allowed to continue their studies in the main study programme. Students who do not have the required English Language achievement may apply for a student visa on conditional basis and are allowed to enrol in an English Language Certification programme at APU upon arrival in Malaysia and, subsequently, appear for the IELTS/TOEFL/PTE/MUET assessment.

Students who are unable to obtain the required level of English Competency during the maximum 12 months' period, will not be allowed to pursue their studies in the main programme and will have to return to their home country.

Students from English speaking countries and those with qualifications taught in English (IGCE, A-Levels, IB, American High School Diploma etc) are exempted from English requirements. Applications for exemption must be accompanied by supporting documents.

Note: The above entry requirements may differ for specific programmes based on the latest programme standards published by Malaysian Qualifications Agency (MQA).

APU FOUNDATION PROGRAMME

FLEXIBILITY OF CHOICE

MODULES YOU STUDY

The modules studied help develop your study skills, introduce you to what you can expect on your degree and also allow you to discover what you can study depending on whether you choose a degree in Accounting, Banking, Finance, Actuarial Studies, Business & Management, Computing & Technology, Engineering, Industrial Design, Animation and Visual Effects.

ENRICHING EXPERIENCES – MORE THAN JUST A FOUNDATION

The APU Foundation Programme lays the pathway towards professional tertiary education. It is a vital transformation point for students; soft skills, general knowledge and preparatory subject fundamentals acquired at the Foundation lead to excellence in a student's education performance, as well as career-readiness as they move on as global professionals eventually. This is achieved through 4 key areas:

- Leadership & Teamwork
- Problem-Solving Skills
- Social Skills & Responsibilities
- Practical Skills

The unique support system at APU Foundation Programme consist of helpful academic mentors who are committed in ensuring academic achievements, providing pastoral care, advising, mentoring, motivating students' potential and performance, to ensure that they undergo a smooth transition from secondary education to tertiary learning.

SEMESTER 1	COMMON SEMESTER 1
ROUTES ▶	BUSINESS & FINANCE
SEMESTER 2	<ul style="list-style-type: none"> • Introduction to Business • Individual, State & Society • Global Business Trends • Public Speaking in English
SEMESTER 3	<ul style="list-style-type: none"> • Academic Research Skills • Principles of Accounts • Economics for Business • Perspectives in Technology / Further Mathematics** • Co-Curricular
You may then proceed to Level 1 of a Degree of your choice in the following pathways	
PRIMARY PATHWAYS ▶	<ul style="list-style-type: none"> - Business & Management - Accounting, Finance, Banking & Actuarial Studies
SECONDARY PATHWAYS ▶ Students may also choose the following:	<ul style="list-style-type: none"> - Computing & Technology - Industrial Design, Animation & Visual Effects - International Relations

YOUR FOUNDATION PATHWAY TO A DEGREE OF YOUR CHOICE

(Please refer to individual course brochure for details and admission requirements.)

CREDIT / GRADE C in SPM / O-Level is required in:

Mathematics

Leading from APU Foundation to your Choice of Degree Studies; please note that a Credit Pass in Mathematics at SPM / O-Level is required for the following programmes:

Computing & Technology

- BSc (Hons) in Information Technology
- BSc (Hons) in Information Technology with a specialism in
 - Information Systems Security
 - Cloud Computing
 - Network Computing
 - Mobile Technology
 - Business Information Systems
 - Internet of Things (IoT)
- BSc (Hons) in Software Engineering*
- BSc (Hons) in Computer Science*
- BSc (Hons) in Computer Science with a specialism in Data Analytics*
- BSc (Hons) in Intelligent Systems
- BSc (Hons) in Multimedia Technology
- BSc (Hons) in Computer Games Development
- BSc (Hons) Cyber Security

Accounting, Banking, Finance & Quantitative Studies

- BA (Hons) in Accounting and Finance
- BA (Hons) in Accounting and Finance with a specialism in Forensic Accounting
- BA (Hons) in Accounting and Finance with a specialism in Taxation
- BA (Hons) in Accounting and Finance with a specialism in Forex and Investments
- BA (Hons) in Accounting and Finance with a specialism in Internal Audit
- Bachelor in Banking and Finance (Hons)
- Bachelor in Banking and Finance (Hons) with a specialism in Investment and Risk Management
- Bachelor of Science (Honours) in Actuarial Studies

* Student who choose to progress to BSc (Hons) in Software Engineering or BSc (Hons) in Computer Science will require Foundation from Computing & Technology route or Engineering route.

** Compulsory for Student who choose to progress to BSc (Hons) in Actuarial Studies.

• Communication Skills	• Personal Development & Study Methods	• Essentials of Web Applications	• Mathematics
COMPUTING & TECHNOLOGY	ENGINEERING	DESIGN	
<ul style="list-style-type: none"> • Introduction to Business • Individual, State & Society • Introduction to Visual & Interactive Programming • Public Speaking in English 	<ul style="list-style-type: none"> • Introduction to Business • Introduction to Visual & Interactive Programming • Engineering Mathematics • Public Speaking in English 	<ul style="list-style-type: none"> • Imaging/Production Skills for Design • Major Project 1 • Design Theory and Practice 1 • Public Speaking in English

CREDIT / GRADE C in SPM / O-Level is required in:

 **Mathematics**

 **Physics OR Chemistry OR Technical Science**

Leading from APU Foundation to your Choice of Degree Studies; please note that a Credit Pass in Mathematics and Physics OR Chemistry at SPM / O-Level is required for the following programmes:

Engineering

- B.Eng (Hons) in Electrical & Electronic Engineering
- B.Eng (Hons) in Telecommunication Engineering
- B.Eng (Hons) in Mechatronic Engineering
- B.Eng (Hons) in Petroleum Engineering
- Bachelor of Computer Engineering with Honours

Leading from APU Foundation to your Choice of Degree Studies:

Business & Management

- BA (Hons) in Business Management
- BA (Hons) in Business Management with a specialism in E-Business
- BA (Hons) in International Business Management
- BA (Hons) in Marketing Management
- BA (Hons) in Human Resource Management
- BA (Hons) in Tourism Management
- BA (Hons) in International Relations

Industrial Design, Animation & Visual Effects

- BA (Hons) Product Design
- BA (Hons) Animation
- BA (Hons) VFX: Visual Effects and Concept Design

}  **PORTFOLIO REQUIRED**

APU ENGINEERING PROGRAMME

B. ENG (HONS) IN ELECTRICAL & ELECTRONIC ENGINEERING

An Electrical or Electronic Engineer maybe responsible for research, design, development, manufacturing and management of complex hardware and software systems and reliable, cost effective devices, many involving the use of new information and computer intensive technologies. These include:

- Integrated electronic systems
- Renewable energy systems
- Generation, transmission and distribution of electrical power
- Instrumentation in electrical and electronic systems
- Manufacturing
- Microelectronics
- Photoelectronics

B. ENG (HONS) IN MECHATRONIC ENGINEERING

Mechatronic Engineering is concerned with the creation, design and building of intelligent machines. This new breed of engineer has to master skills in mechanical, electronic and computer engineering and work in a hybrid manner, meeting an ever-increasing need in industry where complexity of projects is rising and resources are limited. The main areas of activity are:

- Fundamental design and build - ways of embedding intelligence and interfacing to the real world
- Process control - plant condition monitoring and control
- Advance robotics and intelligent Machines
- Image Processing and collision avoidance
- Industrial system such as CIM system, CAD/CAM system
- Design and develop a Mechatronics system

B. ENG (HONS) IN TELECOMMUNICATION ENGINEERING

Telecommunication Engineers design, develop, test and maintain telecommunication systems to ensure fast and steady transmission and receiver of information.. Telecommunication engineering will appeal to those who are interested in the following field:

- Satellite and mobile communication
- Signal processing
- Optical fibres and photonics
- Real-time embedded systems
- Data networks, data coding, compression, encryption and transmission
- Microwave & RF Communications

BACHELOR OF COMPUTER ENGINEERING WITH HONOURS

Computer engineering has emerged as a driving force addressing numerous global demands like smart grids, cognitive buildings, energy management and the likes. Operating platforms for more and more applications have been migrating to the cloud in recent days. Bridging the gap between hardware and software, are Computer Engineers, advancing computer technology towards transforming more and more of these cyber dreams into realities. Some of the areas covered in this major are:

- Digital Logic Design
- Computer Networks
- Embedded and Desktop Operating Systems
- Microcontroller Selection and Programming
- Signal Processing

B. ENG (HONS) IN PETROLEUM ENGINEERING

Petroleum engineers travel to where petroleum reservoirs are known to exist. They define and develop the reservoirs, and produce oil and gas with maximum profitable recovery. Petroleum engineering allows one to specialize in several different oil & gas specialties, each with its own unique challenges and rewards. The careers and job activity areas are as a:

- Drilling engineer, working with geologists and contractors in designing and supervising drilling operations.
- Production engineer, developing processes and equipment to optimize oil and gas production.
- Reservoir engineer and help determine ideal recovery processes, estimate the number of wells that can be economically drilled, and simulate future performance using sophisticated computer models.
- Manager, an entrepreneur, economist, or environmental/safety specialist.

PROGRAMME EDUCATIONAL OBJECTIVES

PEO	ELECTRICAL AND ELECTRONICS ENGINEERING (EEE)	MECHATRONIC ENGINEERING (ME)	TELECOMMUNICATION ENGINEERING (TE)	COMPUTER ENGINEERING (CE)	PETROLEUM ENGINEERING (PE)
PEO1	Be a practicing engineer contributing to the development of Electrical or Electronic Engineering while demonstrating professionalism.	Be a practicing engineer contributing to the development of Mechatronic Engineering while demonstrating professionalism.	Be a practicing engineer contributing to the development of Telecommunication or Electronic Engineering while demonstrating professionalism.	Be a practicing engineer contributing to the development of Computer Engineering while demonstrating professionalism.	Be a practicing engineer contributing to the development of Petroleum Engineering while demonstrating professionalism.
PEO2	Pursue engineering innovation via career advancement opportunities and/or advanced studies in Electrical or Electronic Engineering.	Pursue engineering innovation via career advancement opportunities and/or advanced studies in Mechatronic Engineering.	Pursue engineering innovation via career advancement opportunities and/or advanced studies in Telecommunication or Electronic Engineering.	Pursue engineering innovation via career advancement opportunities and/or advanced studies in Computer Engineering.	Pursue engineering innovation via career advancement opportunities and/or advanced studies in Petroleum Engineering.

PROGRAMME OUTCOMES

The students, upon completion of their study, should attain the following outcomes:

- PO1 - Ability to gain and apply principles of Mathematics, Science and Engineering to the solutions of complex engineering problems.
- PO2 - Ability to undertake complex engineering problem analysis and apply engineering principles to solve them.
- PO3 - Ability to select and use suitable tools and techniques for complex engineering problems.
- PO4 - Ability to investigate complex engineering problems using research techniques.
- PO5 - Ability to design innovative solutions for complex engineering problems.
- PO6 - Ability to communicate effectively and professionally on complex engineering activities.
- PO7 - Ability to comprehend and demonstrate good practices of engineering in sustainable development and environmental considerations for the solutions of complex engineering problems.
- PO8 - Ability to engage in professional engineering practice for safety, health, social, cultural and legal responsibilities in developing solutions for complex engineering problems.
- PO9 - Ability to execute the responsibilities of an Engineer professionally and ethically.
- PO10 - Ability to function effectively as a team leader or a member in a team within a multi-disciplinary settings.
- PO11 - Ability to recognize the need for, and be able to engage in independent and life-long learning towards continuous professional development.
- PO12 - Ability to demonstrate entrepreneurship skills, engineering project management and economic decision making in multidisciplinary environments.

COLLABORATIVE INDUSTRIAL PARTNERS

The School of Engineering at APU is very active in pursuing collaborative partnership with industries with an aim to expose students to professional engineering practices as early as possible in their studies and to provide students opportunities to solve real-world engineering problems as a form of grooming for engineering careers upon graduation. The School of Engineering has been collaborating with industries on two fronts, i.e. to work with professional and industrial institutions, and with multinational corporations and small & medium enterprises (SMEs).

On collaboration with professional institutions, the School of Engineering collaborate closely with the Institution of Engineers Malaysia (IEM). Since then, IEM has been very supportive on all activities organised by the IEM-APU Student Section (IASS) via funding and provision of expertise on technical talks, seminars and workshops. All engineering students are also highly encouraged to participate in IEM activities as Student Member of the institute. The strong ties with IEM has provided students an early appreciation of the roles of engineers and the challenges ahead. For 4 consecutive years, our Final Year students were awarded the IEM Gold Medal Award in which their excellence and outstanding performance were highly recognised by IEM and the members of the industry.

The School of Engineering has also established a MOU with Malaysia Automation Technology Association (MATA) with an aim to expose students to automation technologies via internships, workshops, technical talks and opportunities to work on final-year projects at member companies of MATA. The partnership with MATA has been going from strength-to-strength since 2014, with the successful launch of Automation Technology Day both in 2015 and 2016. The event has provided students great opportunities to seek employment and internship with some of the MATA member companies such as Schneider Electric, Siemens, Festo, Omron, among others. In addition, students also benefitted from the technical talks on Industrial 4.0, Internet of Things (IoT) and workshops on PLC & Pneumatics etc.

The School of Engineering also champions industrial collaboration with companies, be it multinational corporations or SMEs. The companies typically provide final-year project (FYP) titles for qualified 4th Year students to work on. A number of projects have been initiated and completed successfully with companies such as Top Glove, ABB, Daikin R&D, Mawea Industries, ERL Maintenance Support, Signal Transmission, among others. In addition, many such projects resulted from the proactive efforts of the lecturers in establishing Memorandum of Agreements (MOAs) with companies. All these have resulted in a win-win situation whereby companies benefit from the outcome of the research and development efforts while students are able to solve real-work complex engineering problems by leveraging on resources and expertise from the industries.

Final-Year Student and Mentor Winning ITEX Gold and Best Sustainability Awards. On Wind Turbine in FYP Collaboration with ERL Maintenance Sdn. Bhd.

Our Final Year Engineering students have attained the IEM Gold Medal for 4 consecutive years.

B. Eng (Hons) in **ELECTRICAL & ELECTRONIC ENGINEERING**

KPT/JPS(R2/522/6/0060)(MQA/FA4013)02/22

At a glance

Duration:

4 years full-time

This programme is specifically designed to provide students with:

- High-quality undergraduate engineering education by providing students with a curriculum that is firmly grounded in electrical & electronic engineering fundamentals.
- A study in both the areas of electronics fundamentals as well as electrical power systems including the areas of generation, transmission and distribution of electrical energy.

Career options

- Electrical Engineer
- Power Engineer
- Design Engineer
- Product Engineer
- Electronics Engineer
- QA/QC Engineer
- Sales Engineer
- Support Engineer
- R&D Engineer
- Power Plant Engineer
- Optical Engineer
- Transmission Engineer

YEAR 1

Students will understand the basic principles of engineering in the areas of Circuit Analysis, Engineering Materials, Engineering Statics & Dynamics and Engineering Design. Other modules aim to provide the basic academic skills required to meet the demands of employers, as well as thorough grounding in principles of IT and management. Important and relevant skills for managing activities and for their own independent learning are also introduced.

YEAR 2

Here, students start specialising in modules that develop the necessary underlying knowledge and skills in Electrical & Electronic Engineering with modules such as Analogue Electronics, Digital Electronics, Electromagnetic Field Theory, Engineering Software & Applications and Signals and Linear Systems. Engineering Mathematics is provided for the better understanding of the engineering modules.

YEAR 3

Specialised knowledge and skills in the areas of Control Engineering, Computer Architecture, Communication Engineering Principles, Numerical Methods and Statistics, Microprocessor Systems & Embedded Software, Digital Signal Processing, Generation, Transmission and Distribution of Electrical Power, PLC & Pneumatic Systems and Power Electronics & Drives are the critical focus of this level. There is further development of the ability to apply relevant engineering skills with strong critical thinking and analysis. Independent learning continues in all modules.

INTERNSHIP

Students will undertake an Internship/Industrial Training for a minimum period of 16 weeks to prepare them for a smooth transition from the classroom to the working environment.

YEAR 4

The final year Engineering modules provide the necessary industry application and technological skills which become very useful for employment upon graduation. Students' personal and professional development, technical capability and understanding of how to innovate, generate and manage the creation of new ideas will be enhanced. Students will deliver several Engineering Projects where they will demonstrate higher level critical thinking, analysis and solutions development skills which will enhance their employability.

(*All students are required to successfully complete these modules as stipulated by the Malaysian Qualification Agency)

Module outline

YEAR 1

Common Modules

- Analysis of Circuits
- Instrumentation & Measurement
- Introduction to Management
- Engineering Mathematics 1
- Engineering Mathematics 2
- Introduction to C Programming
- Industry 4.0
- Engineering Materials
- Engineering Design
- Engineering Statics & Dynamics

YEAR 2

Common Modules

- Analogue Electronics
- Digital Electronics
- Engineering Mathematics 3
- Electromagnetic Field Theory
- Engineering Software & Applications
- Signals and Linear Systems
- Workplace Professional Communication Skills
- Employee & Employment Trends

Specialised Modules

- Electrical Machines 1
- Electrical Machines 2
- Electrical Power Utilization
- Sensors & Actuators

YEAR 3

Common Modules

- Control Engineering
- Computer Architecture
- Communication Engineering Principles
- Numerical Methods & Statistics
- Microprocessor Systems & Embedded Software
- Digital Signal Processing
- Engineering Project Management

Specialised Modules

- Generation, Transmission & Distribution of Electrical Power
- PLC & Pneumatic Systems
- Power Electronics & Drives

INTERNSHIP (16 weeks)

YEAR 4

Common Modules

- Project Phase 1 (Investigation)
- Project Phase 2 (Implementation)
- Group Design Project
- Engineer in Society

Specialised Modules

- Analogue Integrated Circuits and Systems
- Power System Analysis
- High Voltage Engineering

Elective Modules (choose 2)

- Switchgears & Protection
- Renewable Energy
- Optical Communication & Network
- Product Creation Technology

MQA Compulsory Subjects *

- Ethnic Relations (M'sian Students)
- Islamic & Asian Civilisation (M'sian Students)
- Malaysian Studies (Int'l Students)
- Malay Communication Language (Int'l Students)
- Co-Curriculum

B. Eng (Hons) in **TELECOMMUNICATION ENGINEERING**

KPT/JPS(R2/523/6/0116)(MQA/FA4014)02/22

Duration:

4 years full-time

This programme is specifically designed to provide students with:

- High-quality undergraduate engineering education by providing students with a curriculum that is firmly grounded in telecommunication engineering fundamentals.
- A study in the areas of telecommunication engineering which covers the structure of mobile computing systems, telecommunication systems & networks, and software systems.
- The technical skills to cover the ever demanding expertise in the fields of microwave and optical Transmission, satellite communications and RF communications.

Career options

- RF Engineer
- Network Engineer
- Test Engineer
- Electronics Engineer
- Sales Engineer
- Product Engineer
- Support Engineer
- R&D Engineer
- Infrastructure / Utility Engineer
- Optical Engineer
- Telecommunication Engineer

At a glance

YEAR 1

Students will understand the basic principles of engineering in the areas of Circuit Analysis, Engineering Materials, Instrumentation & Measurement and Engineering Design. Other modules aim to provide the basic academic skills required to meet the demands of employers, as well as thorough grounding in principles of IT and management. Important and relevant skills for managing activities and for their own independent learning are also introduced.

YEAR 2

Here, students start specialising in modules that develop the necessary underlying knowledge and skills in Telecommunication Engineering with modules such as Electromagnetic Field Theory, Engineering Software & Applications, Analogue Electronics, Digital Electronics, Analogue Communication, Digital Communication, Introduction to Electrical Systems, Signals & Linear Systems and more. Engineering Mathematics is provided for the better understanding of the engineering modules.

YEAR 3

Specialised knowledge and skills in the areas of Control Engineering, Computer Architecture, Microprocessor Systems & Embedded Software, Digital Signal Processing, VLSI Design, Numerical Methods and Statistics, Antenna & Propagation, Machine Vision & Intelligence and Modern Communication Systems are the critical focus of this level. There is further development of the ability to apply relevant engineering skills with strong critical thinking and analysis. Independent learning continues in all modules.

INTERNSHIP

Students will undertake an Internship/Industrial Training for a minimum period of 16 weeks to prepare them for a smooth transition from the classroom to the working environment.

YEAR 4

The final year Engineering modules provide the necessary industry application and technological skills which become very useful for employment upon graduation. Students' personal and professional development, technical capability and understanding of how to innovate, generate and manage the creation of new ideas will be enhanced. Students will deliver several Engineering Projects where they will demonstrate higher level critical thinking, analysis and solutions development skills which will enhance their employability.

MQA Compulsory Subjects *

- Ethnic Relations (M'sian Students)
- Islamic & Asian Civilisation (M'sian Students)
- Malaysian Studies (Int'l Students)
- Malay Communication Language (Int'l Students)
- Co-Curriculum

(*All students are required to successfully complete these modules as stipulated by the Malaysian Qualification Agency)

Module outline

YEAR 1

Common Modules

- Analysis of Circuits
- Instrumentation & Measurement
- Introduction to Management
- Engineering Mathematics 1
- Engineering Mathematics 2
- Introduction to C Programming
- Industry 4.0
- Engineering Materials
- Engineering Design

Specialised Modules

- Introduction to Networking

YEAR 2

Common Modules

- Analogue Electronics
- Digital Electronics
- Introduction to Electrical Systems
- Engineering Mathematics 3
- Electromagnetic Field Theory
- Engineering Software & Applications
- Signals and Linear Systems
- Workplace Professional Communication Skills
- Employee & Employment Trends

Specialised Modules

- Human Computer Interaction
- Analogue Communication
- Digital Communication

YEAR 3

Common Modules

- Control Engineering
- Computer Architecture
- VLSI Design
- Numerical Methods & Statistics
- Microprocessor Systems & Embedded Software
- Digital Signal Processing
- Engineering Project Management

Specialised Modules

- Antenna & Propagation
- Machine Vision & Intelligence
- Modern Communication System

INTERNSHIP (16 weeks)

YEAR 4

Common Modules

- Project Phase 1 (Investigation)
- Project Phase 2 (Implementation)
- Group Design Project
- Engineer in Society

Specialised Modules

- Analogue Integrated Circuits and Systems
- Optical Communications & Networks
- Microwave & RF Communication

Elective Modules (choose 2)

- Cloud Infrastructure & Services
- Distributed Computer Systems
- Internet of Things: Concepts & Applications
- Computer Systems Security
- Satellite & Mobile Communication
- Renewable Energy
- Product Creation Technology

B. Eng (Hons) in **MECHATRONIC ENGINEERING**

KPT/JPS (R2/523/6/0191)(MQA/FA4084)02/22

Duration:

4 years full-time

This programme is specifically designed to provide students with:

- High-quality undergraduate engineering education by providing students with a curriculum that is firmly grounded in Mechatronic engineering fundamentals.
- A study of basic engineering sciences and fundamentals of mechanical, electrical, electronics and computer engineering. Students will be able to integrate these four disciplines.
- The technical skills to design, analyse and test "intelligent" products or processes that incorporate suitable controller, sensor and mechatronic devices for robotics and automation.

Career options

- Automation Engineer
- Mechatronic Engineer
- Mechanical Engineer
- Service Engineer
- QA/QC Engineer
- Sales Engineer
- Support Engineer
- R&D Engineer
- Manufacturing Engineer
- IoT Engineer
- Robotics Engineer
- Plant Engineer
- Design Engineer

B. Eng (Hons) in **PETROLEUM ENGINEERING**

KPT/JPS(N/544/6/0004)(MQA/PA6546)10/20

At a glance

Duration:

4 years full-time

This programme is specifically designed to provide students with:

- High quality undergraduate engineering education that combines petroleum, gas and exploration engineering to cater for the ever-demanding oil and gas industry.
- The ability to apply engineering principles to the design, development and operation of systems for locating, extracting, processing and refining crude petroleum and natural gas, including mining and drilling systems, processing and refining systems and facilities, storage facilities, transportation systems, and related environmental and safety systems.

Career options

- Production Engineer
- Commissioning Engineer
- Reservoir Engineer
- Well Engineer
- Drilling Engineer
- Process Engineer
- Oil & Gas Design Engineer
- Plant Engineer

YEAR 1

Students will understand the basic principles of engineering in the areas of Petroleum Engineering, Petroleum Geology, Engineering Materials etc. Other modules aim to provide the basic academic skills required to meet the demands of employers, as well as thorough grounding in principles of IT and management. Important and relevant skills for managing activities and for their own independent learning are also introduced.

YEAR 2

Here, students start specialising in modules that develop the necessary underlying knowledge and skills in Petroleum Engineering with modules such as Rocks & Fluid Properties, Formation Evaluation & Well Logging etc. Other modules such as Introduction to Electrical System, Strength of Materials are provided for the better understanding of the Electronic & Mechanical engineering skills.

YEAR 3

Specialised knowledge and skills in the areas of Reservoir Simulation, Drilling Engineering, Reservoir Engineering, Well Design & Completion, Production Engineering, Enhanced Oil Recovery, Well Testing, Gas Engineering and Numerical Methods & Statistics are the critical focus of this level. There is further development of the ability to apply relevant engineering skills with strong critical thinking and analysis. Independent learning continues in all modules.

INTERNSHIP

Students will undertake an Internship/Industrial Training for a minimum period of 16 weeks to prepare them for a smooth transition from the classroom to the working environment.

YEAR 4

The final year Engineering modules provide the necessary industry application and technological skills which become very useful for employment upon graduation. Students' personal and professional development, technical capability and understanding of how to innovate, generate and manage the creation of new ideas will be enhanced via Engineering Projects.

Module outline

YEAR 1

Common Modules

- Introduction to Management
- Engineering Mathematics 1
- Engineering Mathematics 2
- Introduction to C Programming
- Industry 4.0
- Engineering Materials
- Engineering Design
- Engineering Statics & Dynamics

Specialised Modules

- Fundamental of Petroleum Engineering
- Petroleum Geology

YEAR 2

Common Modules

- Introduction to Electrical Systems
- Engineering Mathematics 3
- Workplace Professional Communication Skills
- Employee & Employment Trends

Specialised Modules

- Strength of Materials
- Element of Reservoir Rock & Fluid Properties
- Fluid Mechanics
- Safety in Oil & Gas Engineering
- Formation Evaluation & Well Logging
- Reservoir Engineering 1
- Thermodynamics & Heat Transfer
- Sustainable Development

YEAR 3

Common Modules

- Numerical Methods & Statistics
- Engineering Project Management

Specialised Modules

- Reservoir Simulation
- Drilling Engineering
- Reservoir Engineering 2
- Well Design & Completion
- Production Engineering
- Enhanced Oil Recovery
- Well Testing
- Gas Engineering

INTERNSHIP (16 weeks)

YEAR 4

Common Modules

- Project Phase 1 (Investigation)
- Project Phase 2 (Implementation)
- Engineer in Society

Specialised Modules

- Field Development Project 1
- Field Development Project 2
- Petroleum Economics

Elective Modules (choose 2)

- Advanced Well Test Analysis
- Advanced Drilling Engineering
- Drilling Hydraulics
- Advance Well Completion

MQA Compulsory Subjects *

- Ethnic Relations (M'sian Students)
- Islamic & Asian Civilisation (M'sian Students)
- Malaysian Studies (Int'l Students)
- Malay Communication Language (Int'l Students)
- Co-Curriculum

(*All students are required to successfully complete these modules as stipulated by the Malaysian Qualification Agency)

B.Eng (Hons) in Petroleum Engineering is powered by:

The infusion of software application for petroleum engineering has been fully incorporated into the curriculum. This is in line with the industry's move towards Digital Transformation and enhancing productivity in the field. Strong Industry-Academia partnerships at APU with organizations such as Petroleum Experts Limited, UK (PETEX) and Rock Flow Dynamics Ltd., USA (RFD) have allowed for the provision of industrial software for student learning and research purposes. APU students have the hands-on practical experiences through petroleum engineering related software tools which also are being applied in their Field Development Project (FDP) and Final Year Project (FYP) works. APU is one of the first universities in Malaysia to provide students with a combination of Integrated Production Modelling (IPM) and Reservoir Engineering Simulation (tNav) modern industrial tools. Further strengthening the curriculum is the application of the Computer Modelling Group (CMG) software which is used for reservoir modelling and enhanced oil recovery studies.

ENGINEERING YOUR SUCCESS

APU'S SCHOOL OF ENGINEERING,
OUR ULTIMATE FORMULA TO SUCCESS:

OUTCOME BASED CURRICULUM

+

VALUE ADDED SKILLS TRAINING

+

STUDENT INDUSTRIAL ACTIVITIES

+

PROFESSIONAL DEVELOPMENT

ENGINEERING PROGRAMME STRENGTHS

OUTCOME BASED EDUCATION

Our curriculum is a collaborative effort, between our team of academicians and our Industry Advisory Panel (IAP). We design our curriculum based on the needs of the industry, to ensure Employability Edge among our students, while maintaining our standards, by ensuring our programmes are full-accreditation compliant.

Our programme delivery is based on Outcome Based Education (OBE), in which high graduate employability is our end result.

VALUE-ADDED SKILLS TRAINING

Apart from technical knowledge in the Engineering field, we highly believe that students should also possess life skills such as critical thinking, communication and professionalism. Our Problem Based Learning (PBL) leads to producing critical and innovative graduates, in which multiple wins in various industry-standard-competitions are our best testaments of success.

STUDENT EXPERIENCES

Our academicians believe that learning should not be confined within classrooms and lecture halls. As early as the first year of their study, students possess the opportunities to gain hands-on exposure to the industry, to experience life as a professional engineer, as well as to build connections with professional engineers through regular industrial visits to manufacturing plants, factories, sites and offices of our industry partners, such as MEASAT, Top Glove, ABB and more.

The IEM-APU Student Section (IASS) is a committee for the students by the students. Since its establishment in 2015, IASS never failed to organize monthly technical events in collaboration with IEM, to boost students' managerial skills, innovation and presentation skills while learning to manage and organize professional-standard events from A to Z.

95%+ OF OUR GRADUATES ARE EMPLOYED BY GRADUATION

DEVINDRAN A/L MUNANDY (Malaysia)

B.Eng (Hons) in Electrical & Electronics Engineering, Class of 2017
Design Engineer – Schneider Electric Malaysia

“Within my first year of having graduated, I managed to secure a job at the M&E Consulting firm, Minconsult Sdn. Bhd. I am forever grateful to APU for providing me with a conducive environment and great opportunities to improve my knowledge and subsequently allowing me to graduate with a prestigious first class honours degree. It was APU that equipped me with a strong foundation in my field of engineering, leading me to this first success. The exposure to project management and technical skills within the programme enabled me to contribute to my employer’s success even from a junior position. Subsequently I moved on to my current place of employment. It comes with its own set of challenges but I still feel equipped to handle this new adventure, thanks again to APU.”

LIM CHEE CHEOW (Malaysia)

B.Eng (Hons) in Electrical and Electronic Engineering, Class of 2014

“I am currently a visiting scholar with State-Key Laboratory of Analog & Mixed Signal VLSI at University of Macau and also a PhD candidate of the University of Malaya. Both institutions are known for state of the art research in the field of Microelectronics. It was at APU that I acquired this strong footing in this field.”

WHAT OUR ALUMNI SAY...

SABRINA, FONG KAH YAN (Malaysia)

B.Eng (Hons) in Mechatronic Engineering, Class of 2013
Process Engineer - NXP Semiconductor (formerly known as Freescale Semiconductor)

"Receiving my degree from APU gave me the skills and knowledge needed in my engineering career. But untimely, APU and its faculty members prepared me for the professional working environment and instill independence and importance of continuous learning that made me a successful engineer I am today."

THIERRY THOMASSE (Mauritius)

B.Eng (Hons) in Electrical and Electronic Engineering, Class of 2015
Sales Engineer & Commercial Support, Vitech Electronics Limited, Australia

"I have been in a working environment for 2 years already and I think that the EEE programme is quite complete. I have used my qualification here in Australia and the professional body, Engineers Australia, classified me as a Professional Electrical Engineer Skill level 1."

ELAHEH SHAKERI (Iran)

B.Eng (Hons) in Mechatronic Engineering, Class of 2016
Project Engineer - Coesia Group, Italy

"Today I'm proud to be considered as the best of the best engineering graduates in the globally leading supplier of high-tech machinery. APU was where I created my future in."

VIMALALAN NAIR A/L CHANDRASHAKARAN (Malaysia)

B.Eng (Hons) in Telecommunication Engineering, Class of 2014
RF Optimization Engineer – Huawei Technologies (M) Sdn. Bhd.

"Graduating from APU not only gave me advanced theoretical knowledge in the field of telecommunication engineering, but, through the various project-based assignments, also allowed me to develop practical skills such as teamwork, problem-solving and effective communication. As an RF Engineer, I utilize these skills every day to work both autonomously and cooperatively."

ANDREW TEH BOON KHENG (Malaysia)

B. Eng (Hons) in Mechatronic Engineering, Class of 2015
Technical Support Engineer - Keyence Corporation

"APU provided me a fabulous platform to equip myself to enter the industrial world, from organizing various engineering events to managing a team. Studying at Asia Pacific University has given me a lot of memorable and happy moments. It provided many opportunities for students to learn and explore. In the university's engineering community, IEM-APU Student Section, I was one of the committee representatives to assist in different events such as seminar coordination, industrial visit arrangements and technical workshops to skill up other students and so on. It was such an honour to be enrolled in Asia Pacific University and be involved in this student section, as I could develop my management skills. The student section established a bridge between our internal communities and other universities to reinforce students' experiences during their university life. These experiences made my student life eventful and valuable during my study at Asia Pacific University."

APU WORLD-CLASS R&D AND INNOVATION

Academic Research

For our staff, learning is a continuous journey where we keep abreast with the latest knowledge in a variety of fields. Our academic staff publish papers and present them at conferences worldwide. Some of the areas of research include:

- Regenerative Power
- Renewable/Green Energy
- Sustainable Development
- Rapid Prototyping
- Material Science
- Modeling of Quantum Dot Systems
- Silicon-based Microdosimeter Applications
- Humanoid Robot development
- Active RFID System in Multi-Hop Wireless Sensor Network
- Automatic Object Retrieval Systems Based on Speech Dictation Technology
- Robotics Haptic and Tactile Sensor development
- Robotics Vision development
- Biomedical Robotics
- Seismic Imaging
- Reservoir Engineering
- Noise Filtration
- Sub-Sea Cable Trenching

INNOVATIVE INDUSTRY-BASED RESEARCH CENTRES @ APU

Asia Pacific Centre of Robotics Engineering

The APCORE (Asia Pacific Center of Robotics Engineering) is an initiative by APU School of Engineering to develop the robotic engineering field within the school. The center undertakes research in various areas of robotics especially humanoid robot development, robotic sensors, robotic vision and biomedical robotics. This will involve lectures by industrial experts and in-house research activities in these areas. The center is also a meeting point for students and lecturers to share ideas and assess their work, as well as a platform for collaboration with industry to keep the research and technology used to be relevant and current. APCORE aims to help lecturers and students to gain knowledge with get hands on experience through involvement in continuous development of robotics technology. Some of projects conducted by APCORE include the development of tele-presence and humanoid robot, participations in international exhibitions and competitions..

Asia Pacific Centre of Analytics (APCA)

Asia Pacific Centre of Analytics – APCA is established in association of multi-discipline expertise from various schools in APU. The vision of APCA is to establish the foundation to develop young data scientists to meet the demands in Malaysia and global. The expertise and experience cover areas of Data Management, Machine Learning, Behavioral Studies, Business Cases, Statistics and Engineering. The formation directs to broad activities in Big Data ecosystem, in line with National vision to make Big Data Analytics the catalyst for nation's economic development: Creating new area in BDA studies, Embedding BDA topics into Undergraduate and Postgraduate studies, Development of Educational and Industrial Framework, Creating Project Marketplace, Research project commercialization and crowdfunding, Consultancy and Training Services.

Centre for Research and Development of IoT (CREDIT)

The establishment of Centre for Research and Development of IoT (CREDIT) is a significant milestone that supports the objectives of the Malaysia National IoT Strategic Roadmap initiative. CREDIT aims to provide students and academic staff the opportunities to access IoT-related knowledge and know-how through various activities. It also acts as a hub to support commercialising potential state-of-the-art solutions resulting from R&D projects. Additionally it allows students to be engaged in a current key requirement sector which will increase employability rates.

APU IEEE Student Branch

APU IEEE Student Branch, which is part of the Malaysia Section under Region 10 (Asia and Pacific), was formulated in 2014. As a member of IEEE, APU students have a wide variety of resources and valuable opportunities to advance their knowledge and future career. APU Student Branch provides numerous educational, technical, and professional development for its members through special projects, activities, meetings, tours and field trips. Following three student technical chapters namely Computer Society, Communication Society and Computational Intelligence are also established under the Student Branch which offer the opportunity for APU student members to network with peers, develop activities for professional development, and share expertise through technical exchange.

APU Motorsports Club

The Club focuses on performance and eco-friendly competitions. The academic staff and students work on constructing efficient cars based on materials study, structural engineering, engine optimum performance and control mechanisms for local races such as EIMA, GT 128, IPMA and Formula Y.

PREPARING STUDENTS FOR THE INDUSTRY

INTERNSHIPS & INDUSTRIAL TRAINING

Prior to starting the final year of study APU students will do internship or industrial training placements for 12 weeks. This is to enable students to gain industrial or professional learning experiences to develop transferable skills for employability so as to enhance their future value to employers. Familiarity with all common processes is essential and exposure at a practical level to a wide variety of processes is required at a level appropriate to young professional. Whilst it is clearly desirable for students to get a feel for the skills involved, the central aim is to achieve appreciation. Industrial training is a key component of learning in an integrated academic curriculum.

Taking this exposure as an important element in the curriculum APU ensures the smooth process of facilitation by starting the process a semester by guiding and nurturing the students via workshops and classes dedicated to;

1. Development of a CV
2. Attending Interviews
3. Working professionally and ethically at a organization

APU also has dedicated Internship Officers per school and a company pool bank in which student can choose from in terms of writing in or direct placements.

FINAL YEAR PROJECTS (FYP)

FYPBaNK – An online facility to support students’ development of their final year project to meeting industry standards, to enhance employability and to assist student in ensuring projects are fit for purpose at the final year of study.

It is a facility web-based integrated system that facilitates the project management responsibilities carried out by the APU FYP students, supervisors, second markers, FYP administrators and project managers.

The companies who have and are contributing to FYPBaNK are INFOPRO SDN BHD, Bank Negara Museum and Art Gallery, DLoop Empeiria Sdn Bhd, Everly Group, GCA, Hilti, LOW Health Care Services, MAD Incubator, MIMOS Wireless Innovation Lab, Neruti Technology Sdn Bhd, REDtone, Signal Transmission (M) Sdn Bhd, Top Glove Sdn Bhd. Students are allowed to work on an industrial FYP proposals selected from the FYPBaNK. Our FYP students have successfully completed the industrial projects selected from the FYPBaNK. The end-product of each industrial project is being used by the real users.

STATE-OF-ART ENGINEERING EQUIPMENT

BEING A LEADER HAS NEVER STOPPED US
FROM TRYING HARDER

AWARDS & ACCOLADES

APIIT Education Group is the proud recipient of
PRIME MINISTER'S AWARD
and Export Excellence Award (Services) for Industry
Excellence Awards - March 2011

The APIIT Education Group received the prestigious Prime Minister's Industry Excellence Award from the Prime Minister of Malaysia. Only one organisation was selected to receive the Prime Minister's Industry Excellence Award from among nearly 30 other award recipients in 8 different categories.

The Industry Excellence Awards, organised by the Ministry of International Trade & Industry (MITI), recognises and rewards organisations for organisational excellence including competitiveness, innovativeness, market presence and export performance. Winning the Prime Minister's Industry Excellence Award is a significant milestone and an honour for APU as a leader in higher education. The award truly reflects our commitment and focus on quality, innovation, graduate employability and internationalisation.

MAKING HISTORY - AWARDS AND ACHIEVEMENTS

Awards received by the university and our students at local, regional and international competitions are a testimony to their knowledge, skills and professional attributes.

INSTITUTE OF ENGINEERS MALAYSIA (IEM) AWARD

- 2018 - Gold Award
- 2017 - Gold Award
- 2016 - Gold Award
- 2015 - Gold Award
- 2014 - Gold Award

INTERNATIONAL INVENTION & INNOVATIVE COMPETITION

- 2018 - Gold Medal (Science, Engineering & Technology)
- 2018 - Silver Medal (Science, Engineering & Technology)
- 2018 - Bronze Medal (Science, Engineering & Technology)

F-SECURE INTERVARSITY CYBERSECURITY CHALLENGE

- 2018 - Champion
- 2018 - 2nd Place
- 2017 - Champion
- 2016 - Champion

HACK@10 CYBERSECURITY COMPETITION

- 2018 - Champion
- 2018 - 2nd Runner Up
- 2018 - 10th Place

INTERNATIONAL UNIVERSITY CARNIVAL ON E-LEARNING 2018 (IUCEL 2018)

- 2018 - 2 Golds
- 2018 - 1 Silver

HACKING, DEFENSE & FORENSIC COMPETITION

- 2018 - Champion

UNIMAKER CENTRAL REGION COMPETITION

- 2018 - Champion

DISRUPT-IT CHALLENGE (DIC)

- 2018 - Winner

SAS NATIONAL FINTECH CHALLENGE

- 2018 - Winner

ASEAN VIRTUAL BUSINESS PLAN COMPETITION

- 2018 - Winner

INNOVATE MALAYSIA FINALS

- 2018 - Winner

MALAYSIA TECHNOLOGY EXPO - INVENTION & INNOVATION AWARDS 2018

- 2018 - Silver

SCHNEIDER ELECTRIC'S 'GO GREEN IN THE CITY' COMPETITION - MALAYSIA

- 2018 - 1st Runner-up
- 2016 - 1st Runner-up
- 2016 - 2nd Runner-up
- 2015 - 1st Runner-up
- 2014 - 1st Runner-up

FISHERTHON

- 2018 - 2nd Place
- 2018 - 3rd Place

FAMELAB MALAYSIA

- 2018 - Audience Choice Award

ASEAN DATA SCIENCE EXPLORERS

- 2018 - 2nd Runner Up

WORLD ASIAN BUSINESS CASE COMPETITION

- 2018 - Top 10
- 2017 - Top 10

H-INOVASI

- 2017 - 'Best of the Best' Award
- 2017 - Gold Award
- 2017 - Gold Award
- 2017 - Gold Award

INTERNATIONAL INTELLECTUAL EXPOSITION (IIEX)

- 2017 - Gold Medal
- 2017 - Best Poster Prize
- 2017 - Bronze Medal
- 2017 - Bronze Medal

INTERNATIONAL INVENTION, INNOVATION & TECHNOLOGY EXHIBITION (ITEX)

- 2017 - Silver Award for the Invention, Innovation and Technology category
- 2016 - Gold Award for the Invention, Innovation and Technology category
- 2016 - Silver Award for the Invention, Innovation and Technology category
- 2015 - Gold Award for the Invention, Innovation and Technology category
- 2015 - Bronze Award for the Invention, Innovation and Technology category
